Dear Parents/Guardians,

We have two important updates:

- The COVID -19 vaccination clinic run by the Oswego County Health Department located in the Paul V. Moore High School Cafeteria will be from 2:30 PM-6:30 PM on Monday, November 15, **for appointments only**. We had hundreds of parents interested in having their children between the age of 5-11 years old respond on the October 25 vaccination interest survey. Unfortunately, we were notified this morning that because of a limited supply of the Pfizer vaccine for children in this age group, we currently can only accommodate the first 80 children that schedule an appointment on the following link. We were told that when the Oswego County Health Department receives more doses, then additional time slots will be added to the link and available at the November 15 vaccination clinic.

- Each time a student exhibits COVID-19 symptoms while at school, our school nurses are calling the parents/guardians and informing them of the symptoms, and providing the parents/guardians with a choice to come and pick their child up at school and drive the symptomatic child to get tested at their pediatrician or any approved testing facility **OR** provide the District with the permission to test their child with a non-intrusive nasal swab BinaxNow COVID-19 rapid test. The rapid tests take 15 minutes to get the results, and if the child is negative, then they are sent back to class unless the child has a fever. Our nurses across the District have already tested over 100 students (**whose parents provided their parental consent**) and staff members and were quickly able to rule out COVID-19 and the child and/or staff member went back to class/work after the 15 minute wait period.

Thank you for your attention to this matter, and have a great afternoon.

Sincerely,
